Teaching, Learning & Innovation Policy

The goal of the policy is to make the Government College, Borda, Margao, an Institution that students choose because of its appropriate infrastructure, research-oriented, and digitally powered environment that can help students grow and keep up with technological advancement. During the Teaching–Learning (T-L) process, students as well as teachers will be encouraged to innovate. Curricular reforms, faculty development programmes, and accreditation renewal on higher standards will be used to boost creativity.

Objectives

- Providing a supportive and positive learning environment
- Offering curriculum transactions that promote social, cultural, physical, and mental development
- Providing varied contexts and experiences to help students develop a wide range of skills
- Ensuring that programmes conducted, prepare students for their chosen occupation
- Create opportunities for regular feedback about learning progress that acknowledges individual learning achievements
- Providing ways for parents/guardians to get involved.

Policy

Teaching/ Learning

- Reviewing the progress of the course by the Academic Auditor and Head of the Department.
- Encouraging teachers toward research and capacity-building training programmes
- Facilitating student-centric learning through experiential learning methods like Internships, Projects, Field trips, Problem-solving etc.

Use of Technology in Teaching/ Learning

- Use of LMS Moodle and Smart Boards in the teaching-learning process
- Posting the teaching materials to facilitate flipped classroom model
- Posting the time-bound assignments and managing all the submissions digitally as well as manually
- The facility to access e-books, journals and magazines is provided by the Library

Innovation

- Planning and implementation of learning activities
- Providing affordable access to information, learning resources, and expert educators
- Developing the Skill sets of students through different courses
- Encouraging students and teachers to write and present papers with a focus on research
- MoUs with academic institutions
